Experience

Nelogica - Software Developer V

Porto Alegre, RS, BR (On-site) | Jan 2026 - Present

- Building international home broker platforms with AI-assisted workflows, real-time systems, and high-performance rendering using WebAssembly (Rust) and WebGPU.

Nelogica - Tech Lead - Administrative Systems

Porto Alegre, RS, BR | Jul 2025 - Jan 2026

- Led a full-stack team responsible for the company intranet and extranet using PHP and TypeScript, driving the rewrite of both systems to modernize architecture and technology stack.

Nelogica - Tech Lead - macOS and Web Platforms

Porto Alegre, RS, BR | Nov 2024 - Jul 2025

- Led web and macOS trading products, including [Profit Web](#), with TypeScript, Electron, Web Workers, and WebSockets. Platforms reached tens of thousands of users and processed billions of dollars in monthly orders.

Nelogica - Software Developer IV

Porto Alegre, RS, BR (On-site) | Jan 2024 - Dec 2024

- Led development of [Profit Android](#) and [Profit iOS](#) with TypeScript, Vue.js, Kotlin, and Swift. Mobile apps reached hundreds of thousands of active users and processed billions of dollars in monthly orders.

Nelogica - Software Developer III

Porto Alegre, RS, BR (Remote) | Oct 2022 - Feb 2024

- Built and launched the first [Profit macOS](#) platform with Electron and TypeScript for real-time market data and order execution.

Nelogica - Software Developer II

Remote | Jul 2021 - Sep 2022

- Improved runtime performance and initiated the migration of a multi-million-line JavaScript codebase to TypeScript.

Nelogica - Software Developer I

Remote | Jul 2020 - Jul 2021

- Built trading interfaces for [Profit Web](#) and [Vector Web](#) using JavaScript, Vue.js, HTML, and CSS.

Education

Master's in Data Visualization (In Progress)

UFRGS, Porto Alegre, RS, BR | In Progress

- Graduate studies focused on data visualization, visual analytics, and interactive systems.

Bachelor's in Electronic Engineering

UFJF, Juiz de Fora, MG, BR | 2014 - 2019

- Emphasis on signal processing, embedded software, and electronics using Matlab, Python, and C with FreeRTOS.

Electronic Engineering Exchange Program

UBA, Buenos Aires, AR | 2019

- Graduate-level coursework in speech recognition, pattern recognition, biomedical signal processing, and adaptive filtering.

Electro-Mechanical Technician

ETPC, Volta Redonda, RJ, BR | 2011 - 2013

Relevant Projects

Master's Research - GPU-Accelerated Time Series Visualization

In Progress

- Research on GPU-accelerated, interactive time-series visualization for large datasets.

Bachelor Thesis

2019

- Implemented adaptive filtering algorithms in Matlab to analyze harmonics in electrical networks. Available [here](#).

Personal Website

- Publishes experiments with custom 2D renderers and signal-based frameworks on my [website](#).
